Camelot Community Care Expands services to Virginia

Clearwater, FL – Camelot Community Care is excited to announce the awarding of a contract to provide services in Virginia. Through a competitive procurement from Evidenced Based Associates, The Regional Service Coordinator under Virginia's DJJ transformation, Camelot was chosen to provide Functional Family Therapy services in Manassas and Fredericksburg. Functional Family Therapy is an evidenced based family intervention model with the goal of improving family functioning and reducing youth entry into the Juvenile Justice system. Camelot currently provides these same services in South Florida.

Virginia will represent Camelot's third state of operations joining Florida and Ohio. In preparation for services to start in early December 2017, Camelot will be opening office locations in Manassas and Fredericksburg and hiring 7-9 therapist for the program. The program is anticipated to serve more than 200 families annually.
