OUTSTANDING COMMUNITY SERVICE
Bethesda Hospital Foundation’s 18th Annual Women of Grace Luncheon

FROM THE PRESIDENT
On behalf of Bethesda, I wish you all a happy and healthy new year! Last October, we proudly announced our merger with Baptist Health South Florida, headquartered in Coral Gables. This exciting partnership is already having an impact on Palm Beach County with expanded health-care services.

One of the exciting new services coming to our community is the Miami Cancer Institute. This alliance gives Bethesda’s esteemed team of physicians new opportunities to collaborate with nationally recognized oncology specialists, while giving our patients access to the highest level of cancer care and national clinical trials here in Palm Beach County.

In addition, later this spring we will break ground on the new Baptist Health South Florida Surgery Center on the campus of Bethesda Hospital West. This new, modern outpatient surgery center will provide a comfortable environment for patients and families while helping to meet an increasing demand for same-day surgical procedures.

Finally, this month marks Bethesda Hospital West’s fifth anniversary. Our dedicated staff and physicians have cared for well over 50,000 adult and pediatric patients in our Emergency Department, and more than 95,000 inpatients. Read more about the growth of Bethesda Hospital West on pages 8 and 9 of this issue of Bethesda Life.

In closing, I thank our community for your support of Bethesda Hospital. Bethesda is proud to be your community, not-for-profit hospital. Now, together with Baptist Health South Florida, we look forward to continuing to grow with our community while providing the highest level of care for you.

Roger L. Kirk, FACHE
President & Chief Executive Officer
Bethesda Health, Inc.

TEAM BETHESDA WALKS FOR A CURE

Bethesda is a proud sponsor of the 2018 Komen South Florida Race for the Cure® taking place on Saturday, January 27, 2018. Held at Meyer Amphitheatre in West Palm Beach, this annual run and walk is more than just a fundraiser—it is a community-wide celebration of survivors! Susan G. Komen® is a national leader in breast cancer research and community outreach programs.

Bethesda Women’s Health Center represents one of the largest organizations in Palm Beach County to receive patient care funding from Komen to provide screenings, diagnostics and treatment to the underserved. Seventy-five percent of the race proceeds stay in the local community to fund various grant programs, while the remaining 25 percent fund national research programs.

new lung cancer screening test coming to Bethesda

Lung cancer is among the deadliest cancers in the United States. The good news is that when caught early, lung cancer is very treatable. Bethesda Hospital is excited to announce it will soon offer lung cancer screening tests using low-dose CT, which has the safest level of radiation among CT tests. When caught early, a lung cancer screening test can increase survival by at least 20 percent.

Wondering if you’re at risk? If you smoked one pack of cigarettes a day for 30 years, or two packs of cigarettes a day for 15 years, you are at increased risk. Even if you quit smoking five years ago, you are still at risk.

The lung cancer screening test is covered by most insurance plans, including Medicare. Speak with your doctor to see if you are a good candidate for this test, as a physician prescription is required. For more information, call 561-737-7733, ext. 84405, or visit BethesdaWeb.com.
A STEP UP FOR KNEES

Providing the best treatment for patients means staying on top of the latest trends in medical procedures and technology. In June 2017, Elvis Grandic, M.D., Board-certified orthopaedic surgeon, was the first in Palm Beach County to perform a total knee replacement using the Mako® robotic-arm-assisted technology. Previously approved only for partial knee resurfacing, the procedure was recently expanded to total knee replacement surgery as well.

"Today, much of orthopaedics is technology-based," says Dr. Grandic, a member of the Bethesda Hospital Medical Staff and affiliated with Bethesda’s Orthopaedic Institute. “Offering this procedure shows that Bethesda is dedicated to being cutting-edge and innovative. It really is a leader in orthopaedics.”

**INDIVIDUALIZED TREATMENT**

The robotic-assisted total knee replacement is an option for anyone who would otherwise be a candidate for a traditional knee replacement, and it has multiple advantages for doctors and patients. The technology allows for individualized treatment.

New robot-assisted total knee replacement procedure provides cutting-edge treatment for Bethesda patients

Elvis Grandic, M.D.
Board-certified orthopaedic surgeon
Prior to the procedure, doctors take a computerized tomography (CT) scan of the patient’s knee, which creates a digital 3-D model. It is then loaded into the software to develop the pre-operative plan. This ability to customize each procedure to the individual also allows Dr. Grandic to prepare a patient for both partial knee resurfacing and total knee replacement, and then determine during surgery which approach is right for that patient.

“If a patient has arthritis on one part of the knee, we do a partial knee procedure, and if they have it on two parts of the knee, then we do a total knee replacement,” says Dr. Grandic. “With this technology, if we’re not sure whether someone is a candidate for partial versus total replacement, we can set them up for both options, and we can make an intra-operative change if needed.”

ADVANTAGES FOR PATIENTS
Beyond the increased capabilities for surgeons, the technology along with the implant device has many benefits for patients, such as a more natural range of motion. The surgery itself is less invasive and more precise.

Even though the Mako total knee procedure is relatively new, Dr. Grandic is seeing better results for his patients.

“It’s still early, but for the patients we’ve treated, we’ve seen hospital stays decrease—we’ve had some patients leave the next day,” says Dr. Grandic. “From our standpoint, patients can leave a lot earlier. Patients have also had less pain and regained their range of motion more quickly.”

The faster recovery allows patients to return more quickly to the activities they enjoy, such as golf, tennis or even walking on the beach.

FIND WHAT FITS FOR YOU
While this procedure offers advantages for both patients and doctors, that doesn’t mean it will be the right procedure for everyone with a knee issue. For some patients, a traditional total knee replacement may make more sense, or partial knee resurfacing may be a better option.

If you’re experiencing knee pain, talk with your doctor or orthopaedic surgeon to learn more about your options. He or she can evaluate your needs to determine your best treatment options.

TO LEARN MORE
For more information about the Bethesda Orthopaedic Institute, or to find an orthopaedic surgeon affiliated with Bethesda, please call the Physician Referral Service at 561-737-7733, ext. 84499, or visit BethesdaOrthopaedics.org. Orthopaedic surgery is available at Bethesda Hospital East and Bethesda Hospital West in Boynton Beach.
A new placement for a pacemaker component lowers heart failure risk

More than 2 million people worldwide have received an implanted pacemaker since 1960. Over the years, consistent improvements have been made in the pacemaker device itself, all with the goal of keeping patients with heart problems alive and active for as long as possible.

While the pacemaker on the whole has seen huge success, there is a segment of pacemaker recipients whose hearts are strained by the device—a condition called pacemaker-induced cardiomyopathy. These patients, who have an electrical lead implanted low in the right ventricle, are less able to withstand the electrical stimulus to this part of the heart. Over time, they can experience symptoms of heart failure.

Electrophysiologists—physicians who specialize in the heart’s electrical system—and other heart researchers have found a solution to this problem. Rather
Bethesda is proud to be recognized by Healthgrades as a Five-Star Recipient in the Treatment of Heart Failure, Treatment of Heart Attack, Defibrillator Procedures and Pacemaker Procedures in 2018. This honor is due to our outstanding physicians, nurses and other clinicians who are committed to providing high-quality patient care.

Yoel R. Vivas, M.D., performed the His-bundling procedure on patient Betty Sue Freed at Bethesda Heart Hospital in 2017.

Yoel R. Vivas, M.D., a Board-certified electrophysiologist on the Bethesda Hospital Medical Staff, uses His-bundle pacing with selected patients. “Patients who are younger or use the pacing function more than 40 percent of the time might be good candidates,” says Dr. Vivas. He also says that about one-third of patients who are getting their pacemaker for the first time have the His-bundle placement.

Current patients may also qualify for His-bundle pacing if they face a heart-failure risk. Dr. Vivas and the Bethesda Heart Hospital are pioneering this pacing “retrofit” in the region. “We have the most experience with this technique. We’ve treated 30 to 40 patients already,” Dr. Vivas says.

Longtime Florida resident Betty Sue Freed, age 88, of Boynton Beach underwent the His-bundle pacing procedure last year.

“I was playing cards with my girlfriends, and all of a sudden I dropped my cards. They called 911 and the paramedics took me to the hospital,” says Freed.

Freed was taken to the Emergency Room at Bethesda Hospital East where she was evaluated and admitted to the Intensive Care Unit. Dr. Vivas was called in to examine her. He determined that she would need a pacemaker, and due to her specific condition, she would benefit from the His-bundling procedure. Everything went smoothly, and the doctor and patient consider the outcome to be a great success.

“My energy has returned; I’m still the same person,” says Freed, who shops and plays cards with her girlfriends most days of the week.

“I was goin’ and runnin’ before—and I’m grateful that I’m still doing it now.”

FIVE-STAR RECOGNITION
Bethesda is proud to be recognized by Healthgrades as a Five-Star Recipient in the Treatment of Heart Failure, Treatment of Heart Attack, Defibrillator Procedures and Pacemaker Procedures in 2018. This honor is due to our outstanding physicians, nurses and other clinicians who are committed to providing high-quality patient care.

For more information about the interventional cardiology services available at Bethesda Heart Hospital, or to find a physician associated with Bethesda, call 561-737-7733, ext. 84499, or visit BethesdaHeart.org.
This January, Bethesda Hospital West is celebrating five years of caring for our community! Since opening in 2013, the 80-bed hospital, affectionately called “the jewel of the west,” has been surpassing expectations in care while steadily growing to meet the healthcare needs of the community.

With all private patient rooms, Bethesda Hospital West provides a unique patient experience and is reaching new heights in patient satisfaction. It was built on a superstructure designed to grow with the community—up to 400 beds. In addition, the campus is large enough to allow for future development as the need for outpatient and other medical services increases over time.

With a focus on providing quality health services in a caring manner, Bethesda Hospital West has added many new services over the past five years. Most recently, the imaging department expanded by adding a new cardiac CT scanner, adding a valuable diagnostic screening to an imaging department that offers digital, high-quality services such as X-ray, CT and MRI.

In 2015, The Eloise Kimmelman Foundation Center for Interventional Radiology Treatment and Research opened at Bethesda Hospital West so that patients can stay close to home for minimally invasive endovascular and diagnostic cardiac care. This state-of-the-art hybrid suite is also used for interventional radiology.
and other image-guided procedures.

In 2016, Bethesda Hospital West opened a two-bed dialysis unit to help patients with kidney disease. Patients can now enjoy the convenience of staying close to home for this life-saving care.

The Emergency Department at Bethesda Hospital West has grown from 3,000 visits in 2013 to 22,700 visits in 2017. Serving adults and children, vital, life-saving emergency care is closer to home for area residents of all ages.

In the coming year, Bethesda Hospital West is planning to add an Observation Status Unit. These beds allow physicians to monitor their patients for up to 24 hours as they determine the best course of care for each patient’s medical condition.

The demand for outpatient surgery has also grown over the past few years. Bethesda, together with Baptist Health South Florida, is pleased to announce a new outpatient surgery center that will be opened later this year on the campus of Bethesda Hospital West.

Located in the medical office building on the northeast corner of U.S. 441 and Boynton Beach Boulevard, the new surgery center will be a convenient new option for patients and physicians for same-day surgical procedures.

Over the past year, Bethesda has been in the early stages of exploring the opportunity to add new patient beds and expand the operating room capacity—the first major facility expansion for the hospital. Over the next year, plans will be developed to make this addition a reality, offering more care to the growing community. The new unit would retain all the features currently available, such as all private rooms and room-service-style meals, delivered at the patient’s convenience.

Five years ago, Bethesda Hospital West was opened thanks to the support of our community. Today, we continue to be grateful for that support, for the privilege of providing care for our community and the opportunity to continue to grow.
**YOUR TEAM FOR GOOD HEALTH**

The Bethesda Health Physician Group is a premier physician group providing quality care for your family. For more information about any of the physicians listed here, visit BethesdaHealthPhysicianGroup.com, or call toll-free at 855-257-DOCS (3627).

</table>
Bethesda Health Physician Group welcomes Neena Ann Yoyakey, D.O., a family medicine physician who joins Michael S. Burke, M.D., at his Delray Beach office. She provides a variety of primary care services to patients, including preventive medicine, chronic disease management, patient education and osteopathic manipulative treatments.

Recently relocating to South Florida from Michigan, Dr. Yoyakey received her Doctor of Osteopathy degree at the Michigan State University College of Osteopathic Medicine before completing her residency training in family medicine at St. John Macomb–Oakland Hospital in Warren, Michigan. Most recently, she was in practice in Madison Heights, Michigan, at Oakland Family Medicine, where she cared for patients in an urgent care setting.

Dr. Yoyakey is dedicated to providing quality health services and the highest level of care for her patients. During her residency training, she participated in a research project utilizing motivational interviewing techniques for tobacco cessation to help her patients achieve a tobacco-free lifestyle. She is a member of the American Academy of Family Physicians, American College of Osteopathic Family Physicians and the American Osteopathic Association.
This past year has been an exciting time to have been the Chairman of the Board of the Bethesda Hospital Foundation. After working diligently toward finalizing the merger with Baptist Health South Florida in October 2017, we continue to explore the many benefits of this new venture for our community.

While change may bring a certain level of apprehension, this new partnership also facilitates dialog and new opportunities for Bethesda. With challenging times ahead for the healthcare industry, we are still blessed with a loyal group of donors who remain dedicated to the future of Bethesda Hospital.

For the fiscal year that ended September 30, 2017, the Bethesda Hospital Foundation received 2,227 donations totaling $5.1 million in cash receipts. The funds benefited Bethesda’s priority projects, including the Heart Hospital’s Structural Heart Program to provide the TAVR procedure for advanced heart care, our Center for Medical Education to help train new physicians in our community, and the renovation of our Neonatal Intensive Care Unit to help care for our tiniest patients and their families.

While we have gratefully raised more than $51 million toward our $60 million goal for our “Caring for our Community” fund-raising campaign in the last decade, we still need your support! Caring for our community means that Bethesda is committed to fulfilling its mission: to provide quality health services in a caring manner. If you have visited or used any of the services Bethesda offers, we hope you witnessed this mission in action as we strive to serve our patients and community to the highest of standards each and every day.

Your dollars donated to the Bethesda Hospital Foundation have allowed for growth on the campus of Bethesda Hospital East and construction of Bethesda Hospital West, improving and expanding our care for our community to the best of our ability. We are most grateful for your continued investment and thank you for partnering with us as we all “Care for our Community.”
There are three levels of membership to fit everyone’s philanthropic intent and all proceeds benefit the Bethesda Center for Women and Children. Society activities include:

- Magnolia Mingles to grow our membership and foster support for the Center for Women & Children—Spring 2018
- Membership Recognition Brunch—Fall 2018
- Women of Grace Luncheon—Fall 2018
- Special invitations to Hospital Receptions/Dedications

For more information about The Magnolia Society, please contact the Bethesda Hospital Foundation at 561-737-7733, ext. 84445, or visit us at BethesdaHospitalFoundation.org.

From top (clockwise), left to right: Brenda Medore, Ann Heilakka and Leanne Adair; Dale Kirk, Kate Toomey and Gail Murphy; Susan Duane, Mary Blum and Karen Rogers; Regine V. Bataille, M.D., and Jacqueline Moroco Maloney, D.D.S.
The 18th Annual Women of Grace Luncheon was held on November 9, 2017, at the Boca Raton Resort & Club. The Luncheon, chaired by Kimberley Trombly-Burmeister, is an annual event that honors five outstanding women who have contributed remarkable service to our community through local organizations. Bethesda Hospital Foundation is proud to have honored these women and shine the spotlight on the organizations they serve.

The five honorees this year were nominated by the organizations they serve and were chosen from more than 35 nominations. They include Yvonne Boice, nominated by Palm Beach State College Foundation; Tammy Culmer, nominated by Take Stock in Children; Linda Heneks, nominated by YMCA South Palm Beach County; Jacqueline Moroco Maloney, nominated by Bethesda Hospital Foundation; and Kirsten Stanley, nominated by Junior League of Boca Raton.

For the second time, a high school student was recognized as a Future Woman of Grace for her outstanding service to the community. The student, Claudia Cabral, is a senior at Suncoast Community High School and has an extremely impressive volunteer log and academic record.

The Luncheon hosted more than 600 guests and raised nearly $200,000. Proceeds from the Luncheon will be used to purchase a lifelike Maternal and Neonatal Birthing Simulator. This high-tech tool will give Bethesda’s clinical staff advanced training opportunities for real-life patient care situations for moms and newborns in our community.

**SAVE THE DATE**

**63rd ANNUAL BETHESDA BALL**  
**Saturday, March 3, 2018 • The Breakers, Palm Beach**

Join us at one of the oldest Galas in Palm Beach County. Ball Chairmen Marti LaTour and George Elmore invite you to join them to raise funds for the Bethesda Women’s Health Center. In celebration of raising funds for the Women’s Center, the evening’s entertainment is the all-girl band “Jessie’s Girls.” In addition to fantastic entertainment and dancing, guests will enjoy fabulous food prepared by a world-class chef in an opulent garden-themed setting.

**BETHESDA PRO-AM**  
**Wednesday, January 17, 2018 • Pine Tree Golf Club, Boynton Beach**

The Bethesda Hospital Pro-Am was Co-Chaired by World of Golf Hall of Fame members Beth Daniel and Meg Mallon and raised nearly $200,000. Proceeds from the Tournament will benefit Bethesda Women’s Health Center. Every year, LPGA and PGA greats play in this, one of the longest-running Pro-Am tournaments in South Florida, to raise funds for Bethesda.

**5th ANNUAL JEWELS & JEANS**  
**Saturday, February 3, 2018 • Bethesda Hospital West, Boynton Beach**

Tickets are almost sold out for this dazzling event! Join us in your jeans, western wear and jewels for a laid-back and fun night. Hosted by Chairs Stephen and Marie Bedner, guests enjoy dinner and dancing and a live auction hosted by Sheriff Ric Bradshaw to help support Bethesda Hospital West. Sponsorships and ad program space are still available, so contact the Foundation soon.
