1. Larger portion sizes than specified may need to be served to children 13 through 18 years old to meet their nutritional needs.
2. Must be unflavored whole milk for children age one. Must be unflavored low-fat (1 percent) or unflavored fat-free (skim) milk for children two through five years old. Must be unflavored low-fat (1 percent), unflavored fat-free (skim), or flavored fat-free (skim) milk for children six years old and older.
3. Pasteurized full-strength juice may only be used to meet the vegetable or fruit requirement at one meal, including snack, per day.
4. A vegetable may be used to meet the entire fruit requirement. When two vegetables are served at lunch or supper, two different kinds of vegetables must be served.
5. At least one serving per day, across all eating occasions, must be 100% whole grain. Grain-based desserts do not count towards meeting the grains requirement.
6. At breakfast, meat and meat alternates may be used to meet the entire grains requirement a maximum of three times a week. One ounce of meat and meat alternates is equal to one ounce equivalent of grains (one serving).
7. Beginning October 1, 2019, ounce equivalents are used to determine the quantity of creditable grains.

12. Yogurt must contain no more than 23 grams of total sugars per 6 ounces.
13. At snack, select two of the five components for a reimbursable snack. Only one of the two components may be a beverage.

## CCFP Meal Pattern for Children Guidelines to Follow

Child care providers have the unique opportunity to ensure healthy eating habits are developed early and promote wellness to all children in their care.

### Fluid Milk:

- After the child's first birthday and prior to the second birthday, whole milk must be served.
- After the child's second birthday, lowfat (1%) or fat-free milk must be served.
- Flavored milk is not allowed for children under the age of six. Children ages six and older may be served fat-free flavored milk.

### Vegetable or fruit or juice:

- Vegetable or fruit juice must be full-strength, pasteurized, and 100% juice. Unless orange or grapefruit juice, it must also be fortified with 100% or more of Vitamin C.
- Fruit juice must not be served more than once a day.
- One cup of leafy greens counts as ½ cup of vegetables.
- Fresh, frozen, or canned vegetables and/or fruits should be served at least twice a week on the breakfast menu and twice a week on the snack menu.  
Please note: For those centers that claim two snacks and one meal, instead of two meals and one snack, fresh, frozen, or canned vegetables and/or fruits should be served at least twice a week *at each* snack time.
- Good vitamin A sources from vegetables and fruits should be served a minimum of two times a week.
- Good vitamin C sources from vegetables and fruits or fruit juice should be served daily.
- Less than 1/8 cup of vegetables and fruits may not be counted to meet the vegetable and/or fruit component.
- At lunch and supper, one vegetable and one fruit *or* two different vegetables may be served.

### Grains/breads:

- Grain/bread food must be whole grain, enriched, or made from whole grain or enriched meal or flour. Bran and germ are counted as enriched or whole-grain meals or flours. Cornmeal, corn flour, plain corn tortillas/chips, and corn grits must be designated as whole or enriched to be creditable.
- At least one serving per day, across all eating occasions, must be 100% whole grain.
- Only ready-to-eat and cooked breakfast cereals containing 6 grams (g) of sugar or less per dry ounce may be served (refer to the Florida WIC Approved Cereal List).
- Prepackaged grain/bread products must have enriched flour or meal or whole grains as the first ingredient listed on the package.
- Grain-based desserts (e.g. cookies, donuts, granola bars, and graham crackers) do not count towards meeting the grains requirements.

### Meat or meat alternate:

- Commercially processed combination foods (convenience entrees – frozen or canned) must have a CN Label or manufacturer's Product Formulation Statement stating the food component contribution to the meal pattern.
- A serving of cooked dry beans or peas may count as a vegetable or as a meat alternate, but not as both components in the same meal.
- Yogurt must not contain more than 23 g of total sugars per 6 ounces (15 g per 4 ounces or 3.8 g per ounce).
- At breakfast, meat/meat alternates may be used to meet the entire grains requirement a maximum of three times a week. One ounce of meat/meat alternate is equal to one ounce equivalent of grains (one serving).
