Unfortunately these programs don't export the images at a high enough quality to produce a superlative printed material. We are only interested in providing the utmost in quality.

| Resolution |

Resolution also known as DPI (Dots Per Inch) or PPI (Pixels Per Inch) can be described as the number of dots that fit horizontally and vertically into a one-inch space. Generally, the more dots per inch, the more detail captured and the sharper the resulting image.

For an image to print properly, the image resolution must be at least 300 dots per inch (DPI) at the final output size.

| Artwork Size |

Artwork final size should be 7" X 9.5" and should have a 1/4 inch all around safe margin, with no text beyond it.
