

PARKING PLAN GUIDELINES

In an effort to increase safety and minimize disturbance to the residents of the Village of Golf, the Village Council/Staff has established the following parking guidelines for construction vehicles/equipment:

- All vehicles should be parked on construction site if possible.
- Unattended vehicles are prohibited from parking on the street.
- Once unloading/loading of material is complete, vehicle(s) should be moved to an approved parking site.
- If construction site parking is not available, alternative sites may be considered subject to approval of the Village.

At no time shall anyone park on neighboring properties without the written consent of the property owner.

All persons entering the Village must observe the speed limit at all times (25 mph). Failure to adhere to the posted speed limit, as witnessed by a public safety officer, may result in a contractor or sub-contractor being denied access to the Village.
