Embroidered Garment Care Symbols

Deciphering garment care symbols.

General Characteristics:

Listed on the blackboard are the care symbols for embroidered garments which apply to Madeira threads ie. Classic Rayon, Polyneon, Metallics, etc.

These symbols can be found on the back of each Madeira color card and will help to make laundering embroidered items trouble free.

The temperatures listed inside the tub symbols are given in Centigrade; Fahrenheit equivalents are listed below. The circle "P" is indicative of dry cleaning agent that should not be used. A "cl" in the triangle means that any bleach, including chlorine bleach may be used safely. Conversely, an "x" through a triangle means that any bleach except chlorine bleach can be used. The iron symbols refer to recommended heat setting: one dot meaning low heat, three dots meaning high heat.

Follow these instructions and enjoy hassle-free washings!
