VSP Surgical Instrument Kit (SKU# 69000)

Endotracheal Tubes (SKU# 75020 – 75080)

VSP Surgical Drapes 12 pack – Small (SKU# 32724), Large (SKU# 35440)

VSP Surgical Instrument Kit

The VSP Surgical Instrument Kit includes a perfect selection of surgical instruments just right when working with very small, delicate tissue. All of the instruments are made of high-quality, stainless steel and are useful for procedures on birds, reptiles and small mammals. The combination of these surgical instruments is a VSP exclusive.

VSP Surgical Instrument Kit includes:

- Two-over-one forceps are very tiny and beneficial when working to minimize tissue trauma
- Small needle holder provides a comfortable, secure grip on small needles
- Small abdominal retractor is perfect for retraction of small abdominal walls
- Cere/Nostril curette is useful with small mammals and birds, and in treating turtle abscesses
- 3-1/2" mosquito hemostat is gentle enough not to cause excessive tissue damage and small enough to maneuver in small areas
- Iris scissors are small and curved to allow practitioners to focus on small delicate tissue
- VSP tissue elevator/retractor is a retractor for small fragile tissues on one side, and a tissue elevator and blunt dissector on the other side

Endotracheal Tubes

Silicone tubes soften at body temperature, reducing post-surgery irritation. Perfect for administering anesthesia to all sizes of birds, reptiles and small mammals. Available in 0.5 mm increments from 2.0 mm-3.0 mm uncuffed, and 3.0 mm-8.0 mm cuffed. Adapters for anesthetic equipment included.

2.0 mm uncuffed (SKU# 75020)

2.5 mm uncuffed (SKU# 75025)

3.0 mm uncuffed (SKU# 75130)

3.0 mm cuffed (SKU# 75030)

3.5 mm cuffed (SKU# 75035)

4.0 mm cuffed (SKU# 75040)

4.5 mm cuffed (SKU# 75045)

5.0 mm cuffed (SKU# 75050)

5.5 mm cuffed (SKU# 75055)

6.0 mm cuffed (SKU# 75060)

6.5 mm cuffed (SKU# 75065)

7.0 mm cuffed (SKU# 75070)

7.5 mm cuffed (SKU# 75075)

8.0 mm cuffed (SKU# 75080)

Endotracheal Tubes
(SKU# 75020-75080)

VSP Surgical Drape

Made of high-quality, transparent vinyl that permits the monitoring of anesthesia during surgical procedures. The 3" x 6" adhesive surrounding the surgical site fenestration keeps drapes from shifting and prevents contamination during surgery. The adhesive adheres to the patient and can be easily removed, even on feathers. These latex-free drapes are individually wrapped and sterilized. Available in two sizes. The large size complies with guidelines for lab animal survival surgery.

Small size

The 27" long x 24" wide size is very user-friendly and was designed with the veterinarian's small to medium sized exotic patients in mind. Provides the right amount of coverage area for most reptiles, small mammals and small and large birds. It is the only surgical drape available that works well with very small birds, such as canaries and parakeets. A 1/2" slit in the middle of the drape can be cut to form an aperture appropriate for the size of patient and the surgical area. Most experienced exotic animal practitioners prefer this VSP drape over competitors' drapes.

Large size

The 54" long x 40" wide size provides adequate coverage for most medium to large exotic animals and will cover the entire surgery table. A 1/2" slit in the middle of the drape can be cut to form an aperture appropriate for the size of patient and the surgical area. This size is generally too large to be ideal for small exotic animals, but is ideal for larger raptors, reptiles and mammals.

VSP Surgical Drape
54" x 40" drape shown (SKU# 35440).
Also available in the preferred
27" x 24" size (SKU# 32724).
